

Pranav Vivek Sadwelkar

B.E Computer Science & Engineering · Fresher · Internship

sadwelkarpranav12@gmail.com | +91 7887 91 4787 | Banda 416511, Maharashtra | [linkedin.com/in/pranavsadwelkar](https://www.linkedin.com/in/pranavsadwelkar) | github.com/pranav-1205

S U M M A R Y

Computer Science student specializing in Linux/cloud infrastructure (RHCSA, EX188) and applied AI agent systems. Built a multi-agent LLM application combining real-time geospatial data with LangGraph orchestration, alongside hands-on security tooling and a hackathon podium finish.

E D U C A T I O N

B.E. in Computer Science & Engineering

2023 – 2027 (expected)

Mumbai University | Yashwantrao Bhonsale Institute of Technology · Sawantwadi, Maharashtra

CGPA (current): 9.01 / 10 · Relevant subjects: Operating Systems, Computer Networks, Database Management Systems.

Class 12 (HSC) · Goa Board of Higher Secondary Education

2023

DM's PVS SM Kushe Higher Secondary School · Mapusa, Goa · Percentage: 69%

P R O J E C T S

AIDRAC – Agentic AI Disaster Response Coordinator — Personal | Lenovo Leap Hackathon

Tech Stack: Python, LangGraph, Gemini API, React, Leaflet, OSRM/OpenRouteService, OpenStreetMap · github.com/pranav-1205/AIDRAC

- Built a full-stack disaster-response platform pairing a Gemini-powered multi-agent system (LangGraph) with live geospatial data to surface safe routes and nearby emergency resources.
- Designed concurrent Weather, Alert, and Infrastructure agents for AI decision support, with per-incident state persisted across requests.
- Ingested live CAP alerts from IMD/NDMA RSS feeds with deduplication and polygon-based geofencing to filter alerts by exact location.
- Built a weighted safe-destination scoring algorithm over live OSM data (hospitals, shelters, police, fire) with OSRM/OpenRouteService turn-by-turn routing and Haversine fallback.

ColdGuard – Temperature Monitoring & Cooling System Simulation — Team | Quantexera Hackathon, 3rd Place

Tech Stack: React, Node.js, Express.js, Socket.IO, MQTT, MySQL · github.com/TEJASPATIL0710/ColdGuard.git

- Built a real-time IoT cold-chain simulation platform streaming temperature, battery, solar, and GPS data to a live dashboard via Socket.IO.
- Implemented REST and MQTT ingestion pipelines for external sensor data, with an ESP32 signal-processing service and threshold-based alerting.
- Persisted simulation history and event logs to MySQL; presented the project and secured 3rd place at the Quantexera Hackathon.

WeShare – Real-Time Collaborative Notes Application — CodTech IT Solutions Internship | 4 Weeks

Tech Stack: React, Node.js, Express.js, Socket.IO, Yjs (CRDTs), MongoDB · github.com/pranav-1205/WeShare---Collaboration-platform.git

- Built a Google-Docs-style collaborative note editor with conflict-free real-time sync across multiple users using Yjs CRDTs over Socket.IO.
- Implemented JWT authentication with httpOnly cookies, owner-controlled read/write permissions, and shareable links with QR-code access.
- Delivered as the final task of a 4-week CodTech IT Solutions internship, with debounced autosave to MongoDB and a live participant panel.

Penetration Testing Framework API — Team Project | College

Tech Stack: Python, Flask, python-nmap, SQLite · github.com/Hanu175/Penetration-Testing-Framework-API.git

- Developed a Flask-based penetration testing framework automating network scanning and vulnerability assessment via a dashboard interface.
- Integrated SQLMap and Hashcat for automated SQL-injection testing and password-hash cracking, backed by a relational schema for scans and results.
- Collaborated in a 4-person team on backend REST APIs, database integration, and PDF report generation.

SKILLS

- Programming Languages: C, Python, Java, JavaScript
- Web Development: HTML, CSS, React.js, Node.js, Express.js
- Databases: MySQL, MongoDB
- Linux & DevOps: Linux Administration, Git, GitHub, Podman, OpenShift Fundamentals
- Agentic AI: LangGraph, Gemini API, Multi-Agent Orchestration, Prompt Engineering

ACHIEVEMENTS & CERTIFICATIONS

- Ranked 3rd in QUANTEXERA Hackathon · 2026
- RHCSA (Red Hat Certified System Administrator) - Red Hat · 2026
- Red Hat Certified Specialist in Containers (EX188) - Red Hat · 2026
- Solved 130+ problems on LeetCode with a contest rating of 1460 and ranked in the top 60% globally after participating in coding contests

EXTRA - CURRICULARS

- Non-Technical Head of Computer Department at YBIT
- Secured 1st place in Inter-Institute Table Tennis Doubles competition
